

Alerts for: East Vancouver Island

Warnings

4:52 AM PST Thursday 03 December 2015

Wind warning in effect for:

- East Vancouver Island

Strong winds that may cause damage are expected or occurring.

Southeast winds near 70 km/h will persist over exposed coastal sections today as a strong Pacific frontal system approaches the coast. The strong southeast winds will ease late this afternoon as the system moves to the east. However, a strong burst of west winds near 70 km/h will occur near Juan De Fuca Strait this evening as a low crosses northwest Washington.

Damage to buildings, such as to roof shingles and windows, may occur. Loose objects may be tossed by the wind and cause injury or damage. Be prepared to adjust your driving with changing road conditions due to high winds.

Wind warnings are issued when there is a significant risk of damaging winds.

Environment Canada meteorologists will update alerts as required. Please monitor local media or Weatheradio. To report severe weather, send an email to pacificstorm@ec.gc.ca or tweet reports to #BCStorm.

3:35 AM PST Thursday 03 December 2015

Rainfall warning in effect for:

- East Vancouver Island

Rain, at times heavy, continues.

Further rainfall amounts of 30 to 50 mm are expected today due to a slow moving Pacific frontal system. The rain will taper to a few showers early this evening when the front moves to the east.

Heavy downpours can cause flash floods and water pooling on roads. Localized flooding in low-lying areas is possible.

Rainfall Warnings are issued when significant rainfall is expected.

Environment Canada meteorologists will update alerts as required. Please monitor local media or Weatheradio. To report severe weather, send an email to pacificstorm@ec.gc.ca or tweet reports to #BCStorm.
